Dear Sir:

Responsive to the non-final Office Action dated March 2, 2001, please enter the following  
remarks.

**RECEIVED**

**JUN 5 2001**

**Technology Center 2600**

**REMARKS**

Claims 1-25 are pending in the present application. Claims 1 and 16 are independent.

Claims 1-25 are rejected under 35 U.S.C. § 103(a) as being unpatentable over Sporre (U.S. Patent No. 5,966,657) in view of Leblanc et al. (U.S. Patent No. 5,960,341). Applicant respectfully traverses this rejection.

Sporre and Leblanc et al., either alone or in combination, do not teach all the features of independent claims 1 and 16. In particular, neither reference teaches or suggests,

...sending a measurement request from one of a main controller and a first base station to at least a second base station, said measurement request requesting said second base station to make operation measurements of at least one signal transmitted by said first base station,

as recited by claim 1 and similarly claim 16.
